DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the amendment filed on 12/13/2004 and the Appeal Brief filed on 1/31/2005.

It is noted that in the mentioned amendment, applicant has amended claims 15 and 18 and canceled claims 16-17. The remaining claims 7-13, 15 and 18-19 are examined in this application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the claim(s):

In claim 7: on line 1, **changed "nigh" to -night--.**

Allowable Subject Matter

3. Claims 7-13, 15 and 18-19 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The night vision assembly as recited in each of claims 7, 13 and 15 is patentable with respect to the applied art by the limitations related to the structure of the fastener associated with an image intensifier device including a housing and a

lens assembly wherein the fastener comprises an enlarged head having substantially the same shape as a lens cap or the cylindrical portion of the lens assembly so that the lens cap can be removed from the lens assembly and retained on the fastener with an interference fit when the lens assembly is in use. It is noted that the use of a lens cap for covering a lens assembly of an optical device having a housing when the lens assembly is not in use and then be removed from the lens assembly to retain on a section of the housing is disclosed in the Japanese reference No. 2-118534 (see the attached English translation on page 3); however, the device provided by the mentioned Japanese reference does not include an image intensifier device and a lens assembly operatively arranged therewith for receiving low intensity light. There is not any reference be found by the examiner to suggest the use of the lens cap disclosed by the mentioned Japanese reference in a night vision device having the features of a lens cap for use in a device comprises an image intensifier device and a lens assembly operatively arranged therewith for receiving low intensity light.

The Examiner regrets to allow the application after the applicant has filed an Appeal brief; however, the applicant's arguments provided in the brief are persuasive on the issue of nonobviousness.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
